

# Oh Snap !!!

Art 2020 - 2021

Hi my name is Ms. Dagum and let me tell you ...

When the world took a pause ..

**March 13, 2020 - we went on spring break and never came back ...**

**The classes went to virtual format ...  
The challenge : The arts are essential, but enrichment classes often involve physical materials, group activities, or even audiences—requirements that aren't easily met in digital environments. Additionally, teachers typically serve multiple grades and classes that require differentiated lesson plans...**

# No access to art materials ... what to do...

- Instead of focusing on skill-based assignments, some teachers use basic household materials or found objects (many students have no access to the typical art supplies).
- Social media apps - Instagram, Snapchat/ bitmojis etc.
- Digital collaging with apps ...

## FACE 2 FACE

**Face-to-face** instruction is that **face-to-face** lectures involve students and instructors interacting in real time.

Students in the classroom adhering to social distancing protocol...

Teachers present lesson that will facilitate 1.5 growth with engagement but remains socially distant

## BLENDED

Blended courses (also known as hybrid or mixed-mode courses) are classes where a portion of the traditional face-to-face instruction is replaced by web-based online learning. Blended learning uses technology to combine in-class and out-of-class learning.

## DIGITAL/VIRTUAL

education that takes place over the Internet. It is often referred to as “elearning” among other terms. • Online Learning: Internet-based courses offered synchronously and/or asynchronously. • Mobile Learning: by means of devices such as cellular phones, PDAs and digital audio players (iPods, MP3 players).

- Geeohsnap – is the most famous snapchat content artist / influencer

# Adobe Photoshop Camera (FREE)

is one of the best photo editing apps due to its AI, which applies special effects and photo corrections before or after you shoot with your phone's camera.

- uses filters, called “lenses” to apply special effects or make adjustments to color, lighting and clarity.
- use of Adobe Sensei which automatically identifies the type of photo (portrait or landscape) and creates masks for key aspects, such as a face or the sky.
- some lenses have “sprites” – smart objects that can be pinched, zoomed and moved within a Sensei identified area of the picture.

# Pixlr (Free/Premium Version)

- Intuitive interface
- Easy to use photo adjustment tools
- Brushes for selective edits
- Fun, attractive filters, overlays, borders & stickers
- Library of photo tools have little depth
- Pixlr has a nice variety of easy to use photo adjustment tools, without overwhelming you with choices. This includes brushes to apply selective edits (such as darken or undo). The libraries of special effect filters, overlays, and borders are fun and generally attractive. The cartoonish stickers are varied and fun. Quickly create collages, using preset layouts or designed templates that allow you to shuffle your photos, as well as zoom and move them within the placeholder

# PHOTO EDITOR

## NEW GENERATION PIXLR

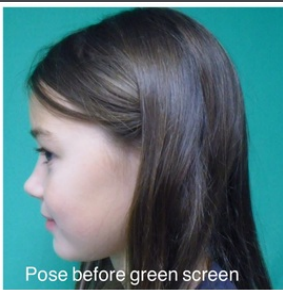

Pixlr, the World's Favorite #1 Online Photo Editor lets you edit photos right in your browser for Free. Experience next level, intuitive photo editing with AI-powered tools for quick yet professional edits. Our editor opens almost any image format such as PSD (Photoshop), PXD, JPEG, PNG (transparent), WebP, SVG and more.

ADVANCED PIXLR E

OR

PLAYFUL PIXLR X

We have two brand new(ish) editors - select your flavor!

Pose before green screen

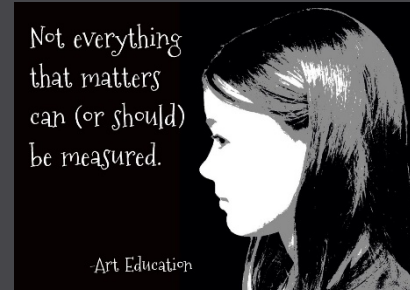

Mask & add black in superimpose

Stylize FX poster in pixlr

Effect-too old - Agnes in pixlr

Not everything that matters can (or should) be measured.

Art Education

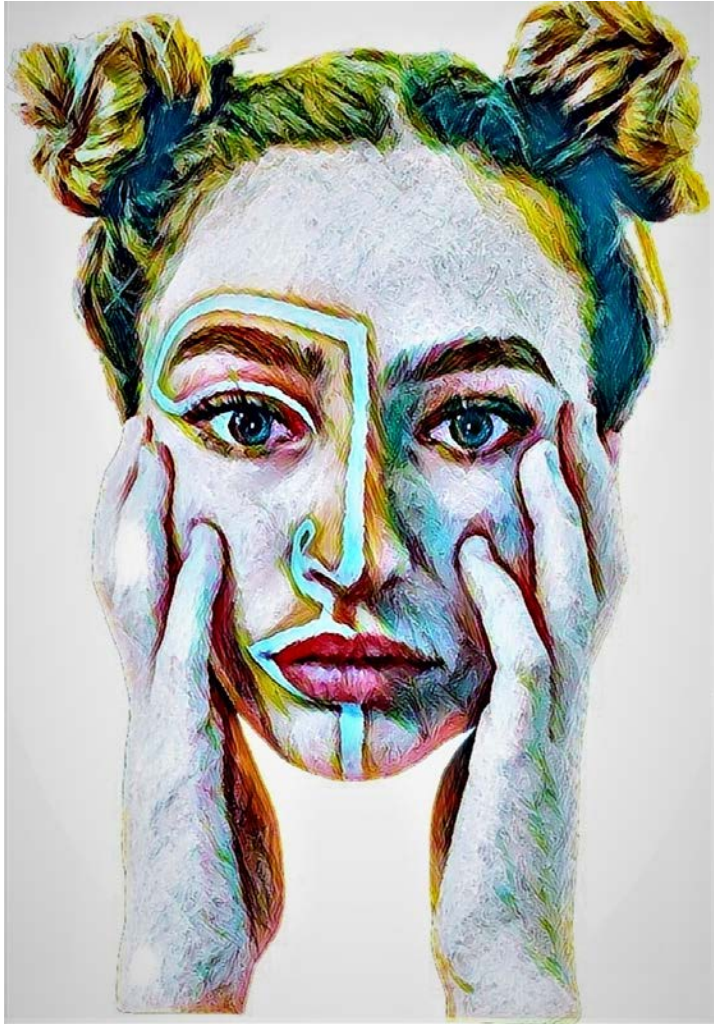

# Snapseed (Free)

- Superb photo-editing tools
- Nondestructive editing
- Selective edit brushes
- Nice selection of photographic filters
- Requires a certain level of photographic expertise
- No auto-save
- Snapseed isn't for the casual user, but for serious photographers who want or need to spend time creating the best possible image while on the go. As such, it has a full array of top-notch editing tools, including selective edit brushes, plus a nice collection of film-related filters (such as Lens Blur, Retrolux and Double Exposure).
- For detail-oriented photographers: range of exposure, color, masking and reshaping tools, brushes, and filters is available . Because the editing is nondestructive, you can always go into the Stack (the layers of edits) and adjust or eliminate any edit (including correcting misspelled text). Or you can use a Stacks brush to apply an effect to only a portion of your picture. In addition, you can save a Stack of edits you've applied to a picture as a "Look," which can then be applied to other photos and shared with other users.

# Adobe lightroom (Free/ Premium)

- Powerful, top quality photo processing
- Great learning tools
- Deep feature set
- Non-destructive image editing
- Probably overkill for casual photographers
- The mobile version of Adobe Lightroom (iOS and Android) is part of cloud-based workflow that includes storage of your entire photo library and access to the full-resolution files (original and edited) on all your devices (mobile, laptop and desktop). So, when purchased with the entire Lightroom system (starting at \$9.99/month), you're buying into a powerful photo processing ecosystem that provides professional-level control and quality. However, if all you want is a top-notch photo app on your phone or tablet, the standalone Lightroom Mobile is free.
- Lightroom Mobile is a great learning platform. Its ever-growing library of interactive tutorials will teach you to edit your images like a pro. And you can contribute your own edited pictures to Lightroom Discover.

## PicsArt (Free/premium version)

- PicsArt is my class top pick as the best photo editing app, because it's fun, easy to use, yet covers just about all the bases for consumer mobile photography. It provides lots of creative control, excellent image-editing tools and a large variety of attractive filters. In addition, you can quickly select or create fun stickers, combine your pictures into highly customizable collages, add artistic text and share. The full-featured camera module includes pre-capture effects and photo tools.

# PicsArt Labtime

The exercise ...
