INTRODUCTION

On August 24, 2010, the U.S. Department of Education announced that Florida was a winner of the federal Race to the Top Phase 2 competition. An important component of Florida's winning application focused on the *-*Standards and Assessments" assurance area, including the creation of high-quality, balanced assessments. Included among the initiatives managed by the Office of Race to the Top (RTTT) Assessments were seven projects awarded to Local Education Agencies (LEAs) individually or in partnerships to create high-quality assessments for hard-to-measure content areas.

The Florida Department of Education sought and included recommendations from educators across the state, including the Florida Organization of Instructional Leaders (FOIL) and a State Advisory Committee on District-Developed Student Assessments for Instructional Effectiveness (DDSAIE), made up of parents, teachers, and district-level administrators, to determine the appropriate scope of work for assessments for the hard-to-measure content areas. Based on these recommendations, teacher assignment and student enrollment data were analyzed to determine the courses that will reach the greatest number of students and teachers in the hard-to-measure content areas. A Next Generation Sunshine State Standards (NGSSS) benchmark analysis was compiled for the selected content areas. Visual Arts was identified as a content area with courses having the greatest need for assessment development.

This project is intended to provide Florida public and charter school districts with an extensive bank of assessment items that are of high quality, are standards-based (NGSSS), and are vetted by Florida educators. When the item bank and test platform are fully operational, Florida public and charter school teachers and districts will have the ability to search the bank, export items, and generate customized assessments to meet their needs. In addition, a public level of practice items will be available to students and parents, which independent schools may access as well.

Mission Statement

Although not all benchmarks lend themselves to large-scale testing, successful schools recognize the need for students to master all of Florida's standards. The increased rigor exemplified in the NGSSS will enhance student performance in a rapidly advancing global environment.

Origin and Purpose of the Specifications

The LEAs of Miami-Dade County, Palm Beach County, Broward County, Leon County, Pinellas County, Polk County, and Lake County, along with the Florida Art Education Association, the Florida Department of Education (DOE), and committees of experienced Florida educators, developed and approved the *Specifications*. The *Specifications* is a resource that defines the content and format of the test and test items for item writers and reviewers. Each grade-level *Specifications* document indicates the alignment of the items with the NGSSS. It also provides all stakeholders with information about the scope of the Florida Visual Arts Item Bank.

Scope of This Document

The *Specifications* provides general and grade-specific guidelines for the development of all test items contained in the Florida Visual Arts Item Bank for grades K–12.

The Criteria for the Florida Visual Arts Items section addresses the general guidelines used to develop multiple-choice items, constructed-response items, technology-enhanced items, and performance tasks. The Cognitive Complexity of the Florida Visual Arts Items section addresses the various levels of cognitive complexity or depth of knowledge.

The Guide to the Grade Level Specifications section explains the visual arts benchmarks for which items were written and identifies the ways each benchmark is assessed. This section also provides content limits and stimulus attributes.

Overall Considerations

This section of the *Specifications* describes the guidelines that apply to all test items developed for the Visual Arts Item Bank.

Overall considerations are broad item-development guidelines that should be addressed during the development of test items for the Visual Arts Item Bank.

- Each multiple-choice item should be written to measure primarily one benchmark; however, other benchmarks may also be reflected in the item content.
- Constructed-response items, technology-enhanced items, and performance tasks may be written to reflect more than one benchmark.
- All items, regardless of the item format, should be grade-level appropriate in terms of cognitive demands and reading level.

- At a given grade, the items should exhibit a varied range of difficulty.
- The reading level of the items should be on or below the grade level of the students for whom they are intended. Items intended for kindergarten and first-grade students should contain pictures for the multiple-choice options and provide for teachers and/or test administrators explicit directions that explain how the item stem and options should be read aloud.
- Items should not disadvantage or exhibit disrespect to anyone in regard to age, gender, race, ethnicity, language, religion, socioeconomic status, disability, occupation, or geographic region.
- Items should require students to apply skills previously taught in lower grades. Therefore, these skills will continue to be tested at higher grade levels.
- Some items may include an excerpt from stimulus material associated with several items in addition to the item stem.
- Items should provide clear, concise, and complete instructions to students.
- Each item should be written clearly and unambiguously to elicit the desired response.

REVIEW PROCEDURES FOR THE FLORIDA VISUAL ARTS ITEM BANK

Before being accepted into the Florida Visual Arts Item Bank, all graphics and items must pass several levels of review as part of Florida's development process. Florida educators in conjunction with the DOE and the LEAs scrutinize all graphics and items prior to accepting them for placement in the item bank. The graphics and items are reviewed for content characteristics, potential bias, and any issues of concern to Florida stakeholders. Concerns expressed during the reviews must be resolved satisfactorily before the graphics and items are placed in the item bank.

Review of Graphics

A committee made up of select Florida educators with experience and expertise in visual arts instruction at the appropriate grade levels reviews graphics for potential use in the Visual Arts Item Bank. Of extreme importance is the vital role the educators play in determining the appropriateness of the graphics for test item use. After reviewing graphics, the committee must reach a consensus as to whether a particular graphic will be used in the Visual Arts Item Bank. Each factor considered in this review process is identified in the Criteria for Selecting Graphic Stimulus Materials section.

Review of Test Items

The DOE, the LEAs, and a committee made up of select Florida educators with experience and expertise in visual arts instruction at the appropriate grade levels review all test items during the item development process. The content specialists at the DOE review and edit items, judging them for overall quality and suitability for the tested grade level.

Groups of Florida educators are convened to review the items for content characteristics and item specifications alignment. This review focuses on validity and determines whether an item is a valid measure of the designated NGSSS benchmark, as defined by the grade-level specifications for test items.

The visual arts items in the Florida Visual Arts Item Bank are field-tested in Florida to ensure clarity of items before they count toward a student's score. In the event an item does not test well, it is either deleted or revised. Revised items will require field-testing again before being scored.

Review for Potential Bias and Sensitivity Issues

Both the graphics and the items are reviewed by a group of Florida educators for the following kinds of bias: gender, racial, ethnic, linguistic, religious, geographic, and socioeconomic. Reviews also include a consideration of issues relevant to individuals with disabilities.

The purpose for the sensitivity review is to ensure that the primary purpose of assessing visual arts knowledge is not undermined by inadvertently including in the test any material that is deemed inappropriate. Reviewers consider the variety of cultural, regional, philosophical, political, and religious backgrounds throughout Florida and determine whether the subject matter will be acceptable to Florida students, their parents, and other members of Florida communities. Issues of sensitivity are distinct from bias because sensitivity issues do not necessarily affect student success on an item, whereas bias may. Examples of sensitive topics for Florida students include wildfires, hurricanes, or other topics that may be considered offensive or distracting to students.

UNIVERSAL DESIGN

The application of universal design principles helps develop assessments that are usable by the greatest number of test takers, including those with disabilities and nonnative speakers of English. To support the goal of providing access to all students, the test maximizes readability, legibility, and compatibility with accommodations, and test development includes a review for potential bias and sensitivity issues.

In addition, because the Hard-to-Measure Content Areas item banks are assessing students' ability to apply the content and skills that the students have learned in class through performances or production of works that demonstrate the attainment of the required skills, the nature of the questions as well as the scored products will differ from those commonly used in standardized assessments. However, even with the inclusion of video components and audio components, both as stimulus materials and as evidence for finished products, the principles of universal design must be maintained so that students' scores reflect knowledge of the constructs being assessed and not extraneous features of the task.

During the initial development of the Florida Visual Arts Item Bank, both internal and external reviewers revised items and tasks to allow the widest possible range of student participation. Item writers must attend to the best practices suggested by universal design, including but not limited to the following:

- Reduction of wordiness
- Avoidance of ambiguity
- Selection of reader-friendly construction and terminology
- Consistently applied concept names and graphic conventions

Universal design principles also inform decisions about test layout and design, including, but not limited to, type size, line length, spacing, and graphics.

Throughout the development process for the Florida Visual Arts Item Bank, these elements are carefully monitored. The review processes and field-testing are used to ensure appropriateness, clarity, and fairness.

CRITERIA FOR SELECTING GRAPHIC STIMULUS MATERIALS

Many of the visual arts items will have accompanying graphic stimulus materials; therefore, it is important to select stimuli that will render as high-quality images for both computer displays and print copies. Stimuli may include, but are not limited to, illustrations, paintings, photographs, graphics, collage, sculpture, and video. People appearing in photographs and videos should preferably be of approximately the age of the respective grade. For performance tasks, works of art found in the art classroom can be used to assess the student's ability to meet the benchmark.

Types

The purpose of the visual arts items is to measure student achievement in understanding the principles that underlie works of art, the skills necessary to produce works of art, the tools and media used in the creation of works of art, and the safety measures necessary when producing works of art. Because the art included in this item bank is by definition visual, it will be necessary to include graphic stimuli in many of these items. Artworks often contain the aspect of dimensionality; for example, sculpture is a three-dimensional art form. But because the items in this pool must be rendered both in print and as computer displays, this item pool does not include three-dimensional stimuli within the items themselves and at present will only include two-dimensional stimuli. If a three-dimensional stimulus is required for a question, the stimulus will be supplied by the visual arts teacher. These objects, however, will be limited to those commonly available in art classrooms or easily obtainable everyday objects. The two-dimensional stimuli include black and white line drawings, color drawings, photographs, and video clips. The use of photographs and video clips will allow some display of the aspect of the dimensionality of a work of art. Video clips will also provide the opportunity for presenting an artist's process for completing a work of art so that students can observe variations of techniques, medium use, and tools.

Black and white line drawings should be clear and should demonstrate the focus of the question without superfluous background material present. They should not contain excessive shading that makes the focus of the graphic difficult to immediately discern.

Color drawings should be clear and should demonstrate the focus of the question without superfluous background material present. They should not contain excessive shading that makes the focus of the graphic difficult to immediately discern.

Photographs should be clear and should demonstrate the focus of the question without superfluous background material present. They should not contain excessive shading that makes the focus of the photo difficult to immediately discern.

Video clips should be clear and should demonstrate the focus of the question without superfluous background material present. They should not contain more than two or three people engaged in the activity that is being illustrated. The clip should start at a static position and then show the action to be illustrated clearly from the start to the finish. The clip should last no longer than 1 minute.

Sources

Graphics should be of non-copyrighted artworks in the public domain or produced or commissioned by the item writer expressly for the Florida Visual Arts Item Bank and should represent a wide variety of art forms. Graphics from the public domain should be selected from artworks that are not likely to be familiar to students. Commissioned graphics produced by the item writers for the Florida Visual Arts Item Bank and related products will be the property of the DOE.

Characteristics

Graphics must be clear and easy to reproduce as well as authentic. Graphics that require the test taker to have prior or specialized knowledge that is not consistent with the NGSSS should not be included.

Graphics must function as intact pieces. They must also contain the recognizable key concepts that they are intended to illustrate.

Graphics produced for the Florida Visual Arts Item Bank should reflect the same qualities of art expressed in the NGSSS. Graphics should present subject matter that is grade-level appropriate.

The selection of public domain artworks must follow the same rigorous review process as do all other types of artworks. They should be reviewed by the item writer for any bias and sensitivity issues and grade-level appropriateness.

Content

10

Graphics should be interesting and appealing to students at the grades for which the graphics are intended. Graphics at a given grade level should include a range of age-appropriate artworks that are representative of the art that students may be expected to view and produce in their art classes. Also, graphics should contain conceptually appropriate and relevant subjects. Artworks with controversial or offensive content should not be included in the item bank. Confusing or emotionally charged subjects

should also be avoided. References to trademarks, commercial products, and brand names should not be included.

Modifications

A public domain graphic or work of art should not be modified but should be shown as intended by the artist. This means that public domain artwork that includes potentially offensive or upsetting materials should not be included in the items. However, a commissioned graphic developed specifically for the Florida Visual Arts Item Bank that is otherwise appropriate may be modified to remove or replace offensive or grade-levelinappropriate material.

Graphic Features

Graphics may include text boxes and other labels, legends, keys, and captions. Graphics should also reflect multicultural diversity and avoid gender stereotyping.

Item writers must not develop items for which the correct response depends on recognition of color. If a reference to color is used in an item, the color must be labeled with appropriate text. All artwork must be high quality.

Diversity

Graphics should bring a range of cultural diversity to the test. Characters, settings, and situations should reflect the variety of interests and backgrounds that make up Florida's student population. Graphics should represent and/or be created by people of different cultures and races; however, culture- or region-specific graphics should not create an advantage or a disadvantage for any particular group of students with a particular characteristic, including gender, race, ethnicity, religion, socioeconomic status, disability, or geographic region. These kinds of graphics must include text with sufficient information to allow a student to answer the question.

Length of Video Clip

Video clips should be a maximum of 1 minute long. Because video clips will increase the testing time for an item, having students watch a 2- or 3-minute video clip to answer one multiple-choice question is not an effective use of testing time. In addition, younger students may become inattentive and thus miss the salient features of the clip. Therefore, video clips should last no longer than 1 minute for kindergarten, first-grade, and second-grade students.

EVIDENCE-CENTERED DESIGN

Evidence-centered design provides a schema for the development of the constructedresponse items and performance tasks in the Florida Visual Arts Item Bank. Evidencecentered design makes explicit a structured item-creation process:

- Begin from a clear statement of the proficiencies to be measured.
- Identify the student responses that provide evidence of those proficiencies.
- Define the constructed-response items and/or performance tasks that require the types of student responses identified in step 2.

In many ways, this process is a straightforward extension of a classic approach to assessment (define a framework or content standards, develop item specifications, and write items meeting the specifications). What it adds is an explicit recognition that each item or task provides response-based evidence of proficiencies.

Evidence-centered design is operationalized in the Florida Visual Arts Item Bank's scoring rubrics with the use of scoring assertions that will guide item developers in the design and development of targeted constructed-response items and performance tasks. A scoring assertion consists of (1) a statement of the competency that is to be demonstrated if the assertion is true and (2) the student response or response characteristic that provides evidence for the presence of this competency. For example, a performance task may be designed to assess the competency of creating an artwork that depicts personal, cultural, and /or historical themes. The task may target two proficiencies: (1) creating a work of art using the materials provided and (2) using a theme for the artwork that was commonly used by an identified culture. A sample of the themes used by the identified culture would also be provided for the student to view. The scoring assertion for the first proficiency would include a verbal expression of the proficiency, along with a representation of the particular evidence that the response would have to exhibit (e.g., —... poduces a work of art using the provided materials"). Scoring assertions for the second would be similar but would look for evidence of a -there commonly used by the identified culture," such as a line drawing of an animal seen in everyday life in a representation similar to that used by prehistoric cultures. The explication of the exact actions the student must perform, as well as the evidence of this proficiency in the rubric for the performance task, allows the direct link between the proficiency and the evidence for the attainment of that proficiency.

12

CRITERIA FOR THE FLORIDA VISUAL ARTS ITEMS

The Florida Visual Arts Item Bank contains four types of items: multiple-choice items, constructed-response items, technology-enhanced items, and performance tasks.

Item Style and Format

This section presents stylistic guidelines and formatting directions that item writers should follow while developing items for the Florida Visual Arts Item Bank. Items should be written to measure the knowledge and skills in the designated benchmarks with the underlying expectation that students demonstrate grade-appropriate critical thinking.

General Guidelines

- Items should be clear and concise, using vocabulary and sentence structure appropriate for the assessed grade level.
- Items should be written in the active voice and **not** the passive voice (e.g., instead of *The picture was painted by the student...*, use *The student painted the picture...*).
- Items should **not** contain negative stems; therefore, stems should **not** include the words NOT, EXCEPT, or LEAST.
- Masculine pronouns should **not** be used to refer to both sexes. Plural forms should be used whenever possible to avoid gender-specific pronouns (e.g., instead of *The student will make changes so that he...*, use *The students will make changes so that the...*).
- As needed, item stems may be constructed using more than one sentence.

Multiple-Choice Items

Definition

A multiple-choice item contains a question and four answer choices for grades 3–12. One of the choices is the correct answer and the other two or three choices are incorrect. The incorrect choices must be plausible, for their purpose is to draw the students who have not fully mastered the concept that is being assessed; for example, a common misconception might be used as an incorrect choice.

Multiple-choice items can assess one or more benchmarks and can range from low to high complexity. A multiple-choice item takes approximately 1 minute of testing time to answer. Each item is worth 1 raw score point.

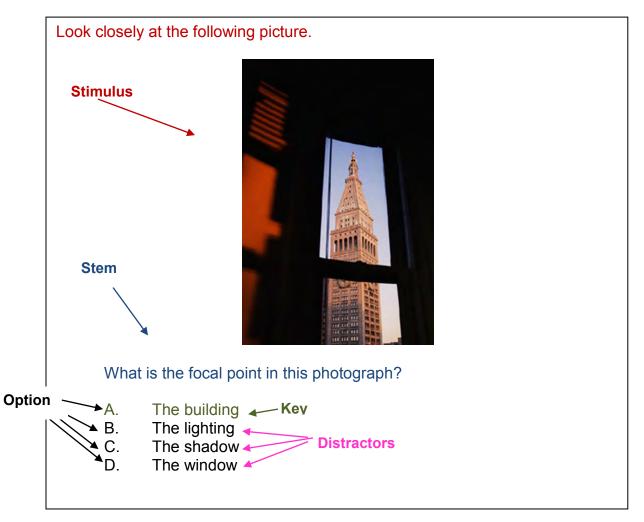

Terminology

14

Listed below are the definitions of the specific terms used for the parts of a multiplechoice item, along with a sample item with each term identified.

Stem: The statement of the question Options: The answer choices Key: Correct answer choice

Distractors: Incorrect answer choices

Criteria

- Multiple-choice items should take approximately 1 minute of testing time per item to answer.
- Multiple-choice items are worth 1 point each.
- Multiple-choice items should have three answer choices (grades K–2) or four answer choices (grades 3–12).
- Multiple-choice items should have only one correct answer.
- Multiple-choice items should have directed stems, not undirected stems (e.g., Which of the following statements is true?). That is, students should be able to answer the question without first looking at the answer choices.
- One-word answer choices should be arranged alphabetically and be balanced in the use of words beginning with a vowel or a consonant. Answer choices should be parallel in reference to parts of speech (i.e., options may all be the same part of speech or may all be different parts of speech). Answer choices of more than one word should be arranged by length: short to long or long to short, depending on the position of the correct answer.
- Answer keys should **not** be the only options to contain words or phrases used in the item stem.
- Answer keys should **not** be the only positively or negatively worded options.
- Distractors should relate to the context of the question. Distractors should be incorrect but plausible based on the topic of the question.
- Outliers should be avoided because they are answer choices that clue the student or draw the student's attention away from the other answer choices. Outliers often contain grammatical clues and may involve answer choices that are longer or more specific than other answer choices. A common type of outlier occurs when a date or a proper noun appears in only one of the options, or not in one of the options and in all the other options, in which case the option without the date or noun is the outlier.
- Answer choices that are the opposite of correct answer choices should **not** be used as distractors.
- Answer choices should **not** include *No change needed, Correct as is, None of the above, All of the above*, etc.
- Answer choices such as *Not enough information* or *Cannot be determined* should **not** be used.

Constructed-Response Items

Definition

Constructed-response items require students to provide an oral or written response. These questions typically ask students to describe, discuss, explain, or critique a work of art, the procedures used, or the choice of media. Constructed-response items have multiple ways in which students can respond correctly. These items can be worth 2 or 4 points depending on the complexity required for a complete response.

Constructed-response items can assess one or more benchmarks and can range from low to high complexity. A constructed-response item takes approximately 3 to 7 minutes of testing time to answer, and each item is worth 2 or 4 score points.

Terminology

Listed below are the definitions of the specific terms used for the parts of a constructedresponse item, along with a sample item with each term identified.

Prompt: The written statement of the question the student must answer

Rubric: A description of how to score the student's response

Score Points: The number of points that can be awarded for a response

Score Point Descriptors: The student response that is required for each score point

The following item sample illustrates the appropriate format for a short constructedresponse item for grades K–12.

Prompt:

Describe two ways to maximize the sharpness of your photographs.

Score Points	Score Point Descriptors
2 points	The student describes two ways to maximize the sharpness of photographs. Techniques and processes include: • Keeping the lens clean • Focusing image • Using a tripod • Reducing hand-shake • Fast shutter speed • Maximum depth of field
1 point	The student describes one way to maximize the sharpness of photographs.
0 points	The response indicates inadequate or no understanding of the concept needed to answer the item. The student may have written on a different topic or written

Short Constructed-Response Item

The sample item below shows the format for a grades K-12 short constructed-response item with the item-specific rubric. In this sample, the question prompt is presented first, followed by the rubric with the applicable score points. A short constructed-response item is worth from 0 to 2 points.

Prompt:

18

Describe a revision you would make to this photograph using vocabulary learned in class, and support your statement.

Item Rubric	
Score Points	Score Point Descriptors
2 points	The student describes a revision using art vocabulary from the class and also supports why he or she would make the revision.
1 point	The student describes a revision and why he or she would make it, but the description does not include vocabulary from the class. OR The student describes a revision using art vocabulary from class but does not support why he or she would make the revision.
0 points	The response indicates inadequate or no understanding of the concept needed to answer the item. The student may have written on a different topic or written +don't know."

Criteria

- SCR items take approximately 3 minutes of testing time to answer and require a phrase or a sentence as a response. They are worth 2 points each.
- SCR items should require a more complex response than a multiple-choice item permits.
- SCR items should not ask for a yes or no response.
- SCR items should contain enough information to focus the student on the task that must be accomplished.
- SCR items should indicate the amount and type of information that must be included in the response.
- SCR items should **not** ask for multiple repetitions of the same task to gain additional points.
- SCR items with two parts should **not** include score point dependencies, that is, achieving points on the second part of the item should not depend on a correct response to the first part of the item.
- SCR items should present a task that can be completed in the time allotted for the question type.
- SCR items should permit multiple solutions to the task presented in the prompt.
- SCR items should have rubrics that are clearly aligned to the task presented in the prompt.
- SCR items must be accompanied by a rubric or scoring guideline that lists the anticipated responses and the point value for each of the responses.
- SCR item rubric score point descriptions should clearly delineate what a student must do to earn each point.
- SCR item rubrics should **not** contain scoring rules that do not correspond to what is asked in the prompt.
- SCR item rubrics should contain unambiguous response exemplars.
- After SCR items are field-tested, sample student papers should be included in the rubrics to provide student-generated exemplars for each score point.

Performance Tasks

Definition

Performance tasks require students to produce a work of art on their own. They can be given a standard set of materials, a technique they must use, and/or the subject of their artwork.

Performance tasks can assess one or more benchmarks and can range from medium to high complexity. A performance task takes approximately 5 to 10 minutes of testing time to answer, and each item is worth 1 to 4 score points.

Terminology

Listed below are the definitions of the specific terms used for the parts of a performance task, along with a sample task with each term identified.

Materials: The materials that must be provided for the student

Setup: The setup for the presentation of the task

Prompt: The directions that are stated before the student begins the task

Rubric: The scoring guidelines for a student's response

Score Points: The points that can be awarded for a response

Score Point Description: The student response that will earn each of the score points

Materials:

• An assortment of photos and magazines, letter-sized paper, scissors, and glue

Set Up:

• Each student has his or her own workspace. Students may share photos and magazines.

Prompt:

• Say: -Greate a photo collage that communicates peace, and apply the elements of art and principles of design."

Item Rubric	
Score Points	Score Point Descriptors
2 points	The student creates a photo collage that communicates peace and creates the compositional principle of unity.
1 point	The student creates a photo collage that either communicates peace or has compositional unity.
0 points	The student is unable to perform the task, does not understand how to complete the task, or unsuccessfully completes the task.

The sample task above shows the format for a grades K-12 performance task, along with its item-specific rubric. In this sample, the materials, the task setup, and the specific prompt are presented first. They are followed by the rubric with the applicable score points. A performance task can be worth from 1 to 4 points.

Criteria

- Performance tasks should take no more than 15 minutes of testing time to answer and require the production of a work of art. They are worth from 1 to 4 points each.
- Performance tasks should permit multiple solutions to the task presented in the prompt.
- Performance tasks should refer to and use materials, tools, and techniques that are appropriate classroom activities for students.
- Performance tasks must be accompanied by a rubric or scoring guideline that lists descriptions of anticipated responses and the point value for each of the responses.
- After performance tasks are field-tested, sample student papers should be included in the rubrics to provide student-generated exemplars for each score point.

• Performance tasks should adhere to all the general guidelines and the constructed-response guidelines listed above.

Scope of Items

The scope of the Florida Visual Arts Item Bank for grades K–12 is presented by the NGSS benchmarks for these grades. The benchmarks serve as the objectives to which the test items are written. There may be additional specification or restrictions by grade level, and these are provided in the content limits section of the item specifications listed under each benchmark.

COGNITIVE COMPLEXITY OF THE FLORIDA VISUAL ARTS ITEMS

The degree of challenge for items in the Florida Visual Arts Item Bank is currently categorized by **cognitive complexity**.

Cognitive Complexity

Cognitive complexity refers to the cognitive demand associated with an item. The cognitive classification system is based on Dr. Norman L. Webb's Depth of Knowledge (DOK) levels.¹ The rationale for classifying an item by its DOK level of complexity focuses on the *expectations made by the item*, not on the *ability of the student*. When an item's demands is classified on thinking (i.e., what the item requires the student to recall, understand, analyze, and do), it is assumed that the student is familiar with the basic concepts of the task. Test items are chosen for the Florida Visual Arts Item Bank on the basis of the NGSSS and their grade-level appropriateness, but the complexity of the items remains independent of the particular curriculum a student has experienced. The cognitive complexity of an item depends on the grade level of the assessment; an item that has a high level of cognitive complexity at one grade may not be as complex at a higher grade.

The categories—low complexity, moderate complexity, and high complexity—form an ordered description of the demands an item may make on a student. For example, low-complexity items may require a student to solve a one-step problem. Moderate-complexity items may require multiple steps. High-complexity items may require a student to analyze and synthesize information. The distinctions made in item complexity ensure that items will assess the depth of student knowledge at each benchmark. The intent of the item writer weighs heavily in determining the complexity of an item.

The pages that follow illustrate some of the varying demands that items might make at each complexity level for the Florida Visual Arts Item Bank. Note that items may fit one or more descriptions. In most instances, these items are classified at the highest level of complexity demanded by the item. Caution must be used in referring to the table (page 28) that describes activities at each cognitive complexity level. This table is provided for ease of reference, but the ultimate determination of the item complexity should be made considering the overall cognitive demand placed on a student.

Item writers are expected to evaluate their items in terms of cognitive complexity and include this on the item template. Items should generally be targeted to the highest level of complexity as appropriate to the assessed benchmark, although some benchmarks

¹ Webb, N. L., et al. (2005). Webb alignment tool. Madison: University of Wisconsin-Madison, Wisconsin Center for Educational Research. http://www.wcer.wisc.Edu/WAT/index.aspx.

call for items at varying levels. When this is the case, writers should take care to cover the range of levels that are appropriate and not create items only at the lower ranges.

Low Complexity

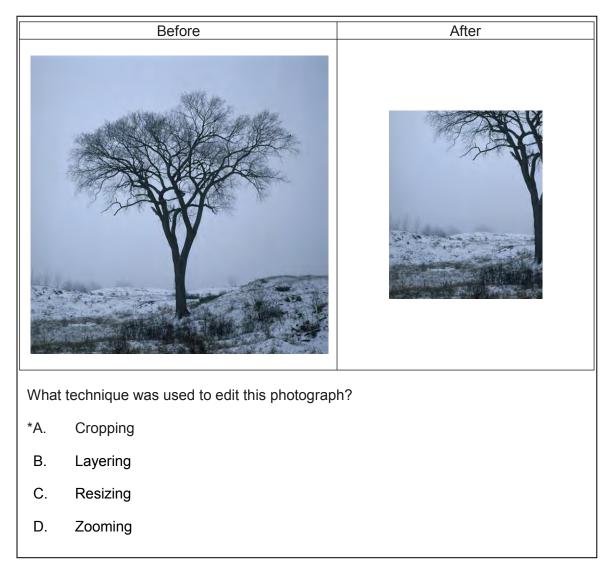

The low-complexity items in the Florida Visual Arts Item Bank require students to recall, observe, question, or represent basic art facts. For a low-complexity item, students are expected to demonstrate simple skills or abilities. A low-complexity item requires only basic understanding—often verbatim recall or simple understanding of an art term or process.

Below is an example of a low-complexity item.

Moderate Complexity

The moderate-complexity items in the Florida Visual Arts Item Bank require two steps: identification and subsequent processing of that information. Students are expected to make inferences and may encounter items that include words such as —alssify," —oragnize," and —compre." Depending on the objective of a particular moderate-level item, students may also be required to explain, describe, or interpret.

Below is an example of a moderate-complexity item.

High Complexity

The high-complexity items in the Florida Visual Arts Item Bank make heavy demands on student thinking. Students may be asked to explain, generalize, or make multiple connections. High-complexity items require several steps involving abstract reasoning and planning. Students must be able to support their thinking. Items may involve identifying a unifying theme across artworks or making complex inferences across pieces of art. Students may also be asked to assess a stimulus for a particular art concept and then apply that concept to a new work of art that they create themselves.

Below is an example of a high-complexity item.

What dominating art element gives this surreal photograph a dreamlike quality?

- A. Balance
- *B. Color
- C. Rhythm
- D. Value

The following table is provided for ease of reference; however, caution must be used in referring to this table, which describes activities at each cognitive complexity level. The ultimate determination of an item's cognitive complexity should be made after considering the intent of the overall cognitive demand placed on a student.

Examples of Florida's V	isual Arts Items Across Coo	nitive Complexity Levels
Low Complexity	Moderate Complexity	High Complexity
How did the invention of digital photography contribute to photojournalism? What is an image that can be created in the dark room without a camera? Which should be used to clean the lens of a camera? Where should you store your photographic prints?	What does an over-exposed photograph look like? Why do photographers compile a set of proofs? What tool can prevent skin contact with harmful chemicals? What can be used to create contrast in a landscape?	Describe the photographic technique and the focal point used in this photograph. What is the issue presented in this photograph? Explain why you might revisit a subject several times, and describe one revision you could make during your process. What dominating art element gives this surreal photograph a dreamlike quality?

GUIDELINES FOR ITEM WRITERS

Florida's visual arts item writers must have a comprehensive knowledge of the assessed visual arts curriculum and a strong understanding of the cognitive abilities of the students taking the test. Item writers should know and respect the guidelines established in the *Specifications* as well as appreciate the spirit of developing test content that allows students to perform at their best. Item writers are also expected to use their best judgment in writing items that measure the visual arts benchmarks of the NGSSS without introducing extraneous elements that may interfere with the test's validity.

Item writers for the Florida Visual Arts Item Bank must submit items in a particular format and must include the following information about each item. Because items are rated by committees of Florida educators following submission to the LEA, familiarity with the directions for rating items would prove useful to all item writers.

Format	Item writers must submit items in the agreed-on template. All appropriate sections of the template should be completed before the items are submitted.
Sources	Item writers are expected to provide sources for all artwork in the item. Acceptable sources for artwork are public domain sources that do not require copyright fees for use. Photos of or original copies of student- generated artwork must be accompanied by a completed permission form.
Correct Response	Multiple-Choice Items: Item writers must indicate which option is the correct answer.
	Constructed-Response Items: Item writers must provide a scoring rubric that includes the required ideas/wording that must be present for each score point.
	Technology-Enhanced Items: Item writers must provide a scoring rubric that describes the required actions that students must perform for each score point.
	Performance Tasks: Item writers must provide a scoring rubric that clearly delineates the properties of the artwork that must be present for each score point.
Option Rationales	Multiple-Choice Items: All options of a multiple-choice item must be accompanied by a rationale.
	For the correct option (key), the rationale must state why the option is correct based on the visual arts benchmark being assessed.
	For each incorrect option (distractor), the rationale must state why the option is plausible and why it is incorrect based on the visual arts benchmark being assessed.

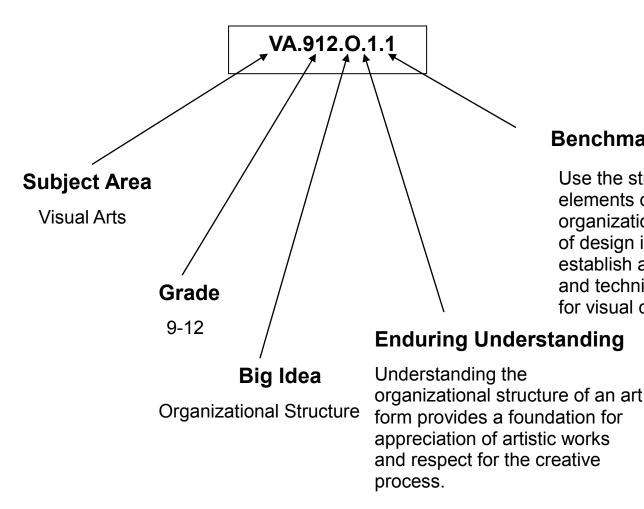

Cognitive Complexity	Item writers are expected to evaluate their items in terms of cognitive complexity and include this information on the item template. Items should generally be targeted to the highest level of complexity as appropriate to the assessed benchmark, although some benchmarks call for items at varying levels. When this is the case, writers should take care to cover the range of levels that are appropriate and to avoid creating items only at the lower ranges.
Submission of Items	When submitting items, item writers must balance several factors. Item submissions should
	 include items for the benchmarks and grade levels assigned to the item writer; include items of varying difficulty; include items at or above the cognitive complexity level of the assigned benchmarks; have an approximate balance of the correct response between the answer choices for multiple-choice items; have an equal balance of male and female names and include names representing different ethnic groups in Florida; have an equal balance of male and female students at the appropriate grade level in stimulus and/or option photographs and drawings; and have an equal balance of ethnic groups in Florida represented in stimulus and/or option photographs and drawings.
Electronic Submission	Items will be submitted directly into the Florida State Item Banking Platform.

GUIDE TO THE GRADE LEVEL SPECIFICATIONS

Benchmark Classification System

Each benchmark in the NGSSS is coded with a system of numbers and letters.

- The two letters in the *first position* of the code identify the **Subject Area** (e.g., VA for Visual Arts).
- The number in the second position (first number) represents the Grade Level.
- The letter in the *third position* represents the **Big Idea**, or category of knowledge, to which the benchmark belongs. In Visual Arts, the Florida Visual Arts Item Bank includes five categories for the Big Idea.
 - Big Idea 1: Critical Thinking and Reflection
 - Big Idea 2: Skills, Techniques, and Processes
 - Big Idea 3: Organizational Structure
 - Big Idea 4: Historic and Global Connections
 - Big Idea 5: Innovation, Technology, and the Future
- The number in the *fourth position* of the code represents the **Enduring Understanding** for the benchmark.
- The number in the *fifth position* shows the specific **Benchmark** that falls under the specified Big Idea and within the Enduring Understanding.

Benchmark

Use the structural elements of art and the organizational principles of design in works of art to establish an interpretive and technical foundation for visual coherence.

Visual Arts	
Grade 9-12	
Big Idea 3	Organizational Structure
Enduring Understanding 1	Understanding the organizational structure of an art form provides a foundation for appreciation of artistic works and respect for the creative process.
Benchmark 1	Use the structural elements of art and the organizational principles of design in works of art to establish an interpretive and technical foundation for visual coherence.

Definitions of Benchmark Specifications

The *Specifications* documents identify how Florida's NGSSS benchmarks are assessed in the Florida Visual Arts Item Bank at grades K–10. For each benchmark assessed in visual arts, the following information is provided in each grade-level *Specifications* section.

Big Idea	A Big Idea is a broad category of knowledge within a content area in the NGSSS. The Big Ideas are the same for all grade levels.
Enduring Understanding	Each Enduring Understanding is a general statement of expected student achievement within a Big Idea at each grade level in the NGSSS.
Benchmark	Benchmarks are grade-level-specific statements of expected student achievement under each visual arts Enduring Understanding. In some cases, two or more related benchmarks are grouped together because the assessment of one benchmark necessarily addresses another benchmark. Such groupings are indicated in the benchmark statement.
Clarification	The clarification statement explains how the achievement of the benchmark will be demonstrated by students for each specific item type. Clarification statements explain what the student will do when responding to items of each type.
Content Focus	The content focus defines the specific content measured by each visual arts item.
Content Limits	The content limits define the scope of content knowledge that will be assessed (e.g., specific elements that can be compared or contrasted) and in some cases indicate areas of the benchmark that will not be assessed. For some benchmarks, additional information is provided to clarify specific directions in developing test items.
Stimulus Attributes	Stimulus attributes define the types of stimuli that will be used in the development of items, including appropriate context or content suitable for assessing the particular benchmark.
Distractor Attributes	The distractor attributes for multiple-choice items give specific descriptions of the distractors for items at each grade level.
Sample Items	Sample items that assess each benchmark are provided at each grade level for each acceptable item format. The sample items are presented in a format similar to those on the test, and the correct answer or scoring rubric for each sample item is provided.

Elements of Art and Principles of Design

When content limits do not specify the elements of art or principles of design, the following list may be used. The list is compliant with the overall content Florida's state-adopted textbooks as of May 2014 and has been approved by state-level content experts.

NOTE: Concepts related to the listed elements and principles may be assessed under the umbrella concepts given. Examples are provided in parenthesis for reference but should not be taken as all-inclusive. Related, grade-appropriate concepts may be assessed as long as they are treated as a specific instance of a parent Element and Principle that is listed below.

Elements of art:

- Line
- Shape (organic, geometric, positive, negative)
- Form
- Color (hue, primary, secondary, etc.)
- Value (tint, shade)
- Space
- Texture

Principles of design:

- Balance (symmetry)
- Unity (dominance, harmony)
- Variety
- Emphasis
- Pattern
- Proportion (scale)
- Movement
- Rhythm

While they should be considered as sub-concepts under the umbrella of the main concepts listed above for general K-12 courses, the following terms may be considered unique Principles of Design in the assessment of grades 9-12 Honors-level courses:

- Contrast
- Repetition
- Figure/ground

Big Idea: Critical Thinking and Reflection

Enduring Understanding: 1. Cognition and reflection are required to appreciate, interpret, and create with artistic intent.

Benchmark: VA.912.C.1.1 Integrate curiosity, range of interests, attentiveness, complexity, and artistic intention in the art-making process to demonstrate self-expression.

Clarification: Demonstrates aspects of self-expression through investigating processes and critiquing own work.

Performance Level Descriptor: To demonstrate proficiency, students will choose from a collection of their own photos or produce photos that show their curiosity, range of interests, attentiveness, complexity, and artistic intention.

Content Focus: Self-expression in art-making

Content Limits: Content is limited to a student's own photographs.

Recommended DOK Level: High

Item Types:

• Performance Task

Sample Performance Task:

Materials:

• A collection of the student's photographs or portfolio, paper, and pencil

Setup:

• Each student has his or her own materials and workspace.

Prompt:

• Say: -Select one photograph that represents an aspect of your personality, and describe how it represents you."

Item Rub	Item Rubric	
2 points	The student selects one photograph that represents an aspect of his or her own personality and describes how it represents him or her.	
1 point	The student selects one photograph, but it does not match the description of his or her personality. OR The student selects one photograph that matches an aspect of his or her personality, but the description does not accurately describe the aspect of personality represented in the photograph.	
0 points	The student is unable to perform the task, does not understand how to complete the task, or unsuccessfully completes the task.	

Big Idea: Critical Thinking and Reflection

Enduring Understanding: 1. Cognition and reflection are required to appreciate, interpret, and create with artistic intent.

Benchmark: VA.912.C.1.4 Apply art knowledge and contextual information to analyze how content and ideas are used in works of art.

Clarification: Identifies or describes how content and ideas contribute to a photograph by applying art vocabulary, processes, and techniques.

Performance Level Descriptor: To demonstrate proficiency, students will use art knowledge to interpret the content and ideas used in a photograph.

Content Focus: Analyze to interpret context and content

Content Limits: Photographs should include clear content and ideas.

Recommended DOK Level: Moderate

Item Types:

• Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

What is the focal point in this photograph?

- *A. The building
- B. The lighting
- C. The shadow
- D. The window

Big Idea: Critical Thinking and Reflection

Enduring Understanding: 2: Assessing our own and others' artistic work, using criticalthinking, problem-solving, and decision-making skills, is central to artistic growth.

Benchmark: VA.912.C.2.1 Examine and revise artwork throughout the art-making process to refine work and achieve artistic objective.

Clarification: Examines artworks and suggests improvements to revise or refine photographs.

Performance Level Descriptor: To demonstrate proficiency, students will describe how a photograph could be revised for improvement.

Content Focus: Revision in photography

Content Limits: Suggested improvements include but are not limited to cropping, changing camera angle, exposures, depth of field, motion, and camera settings. Professional images should be used.

Recommended DOK Level: Moderate

Item Types:

Constructed Response

Sample Constructed-Response Item:

Prompt:

Describe a revision you would make to this photograph using vocabulary learned in class, and support your statement.

Exemplar Response:

40

I would change the camera angle so that the camera looks up at the lion. It would make the lion look more dangerous.

Item Rubric	
2 points	The student describes a revision using art vocabulary from the class and also
	supports why he or she would make the revision.
1 point	The student describes a revision and why he or she would make it, but the
	description does not include vocabulary from the class.
	OR
	The student describes a revision using art vocabulary from class but does not support
	why he or she would make the revision.
0 points	The response indicates inadequate or no understanding of the concept needed to
	answer the item. The student may have written on a different topic or written +don't
	know."

Big Idea: Critical Thinking and Reflection

Enduring Understanding: 2: Assessing our own and others' artistic work, using criticalthinking, problem-solving, and decision-making skills, is central to artistic growth.

Benchmark: VA.912.C.2.7 Assess the challenges and outcomes associated with the media used in a variety of one's own works.

Clarification: Identifies the challenges and outcomes of working with photographic media.

Performance Level Descriptor: To demonstrate proficiency, students will identify challenges in photography.

Content Focus: Challenges and outcomes of working with photographic media

Content Limits: Content includes but is not limited to the challenges of using lighting, exposure, and camera settings in digital and/or film.

Recommended DOK Level: Moderate

Item Types:

• Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

What does an over-exposed photograph look like?

- A. The image is sharp.
- B. The image is blurry.
- *C. The image is too light.
- D. The image is too dark.

Big Idea: Critical Thinking and Reflection

Enduring Understanding: 3: The process of critiquing works of art lead to development of critical-thinking skills transferable to other contexts.

Benchmark: VA.912.C.3.1 Use descriptive terms and varied approaches in art analysis to explain the meaning or purpose of an artwork.

Clarification: Describes and analyzes the meaning or purpose of a photograph using terms used in class.

Performance Level Descriptor: To demonstrate proficiency, students will identify or describe the meaning or purpose of a photograph using art and photography vocabulary.

Content Focus: Photography terminology and elements of art and principles of design

Content Limits: Content includes, but is not limited to, the four-step method of art criticism, visual-thinking skills, and aesthetic scanning as well as elements of art and principles of design. Photographs should demonstrate a clear meaning and purpose.

Recommended DOK Level: High

Item Types:

- Multiple Choice
- Constructed Response

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

What dominating art element gives this surreal photograph a dreamlike quality?

- A. Balance
- *B. Color
- C. Rhythm
- D. Value

Sample Constructed-Response Item:

Prompt:

Describe the photographic technique and the focal point used in this photograph.

Exemplar Response:

44

The grasshopper in the foreground is sharp while the background was made to look blurry. This adds emphasis to the grasshopper.

Item Rub	Item Rubric	
2 points	The student describes a technique used in this photograph and explains how it contributes to the meaning of the photograph. Techniques may include but are not limited to:	
	Angle	
	• Space	
	Lighting	
	Contrast	
	Depth of field	
1 point	The student describes a technique used in this photograph but cannot explain how it	
	contributes to the emphasis of the photograph.	
0 points	The response indicates inadequate or no understanding of the concept needed to	
-	answer the item. The student may have written on a different topic or written +don't	
	know."	

Big Idea: Critical Thinking and Reflection

Enduring Understanding: 3: The process of critiquing works of art lead to development of critical-thinking skills transferable to other contexts.

Benchmark: VA.912.C.3.5 Make connections between timelines in other content areas and timelines in the visual arts.

Clarification: Identifies how advancements made in other content areas contribute to the evolution of photography.

Performance Level Descriptor: To demonstrate proficiency, students will identify the causes and or effects of the evolution of photography.

Content Focus: The evolution of photography

Content Limits: Do not include specific photographers or inventors. Other content areas include the sciences and social sciences.

Recommended DOK Level: Low

Item Types:

• Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

How did the invention of digital photography contribute to photojournalism?

- A. It made the career more exclusive.
- B. It hindered mobility of photographers.
- *C. Results could be reviewed immediately.
- D. Less expensive equipment was required.

Big Idea: Skills, Techniques, and Processes

Enduring Understanding: 1: The arts are inherently experiential and actively engage learners in the processes of creating, interpreting, and responding to art.

Benchmark: VA.912.S.1.2 Investigate the use of technology and other resources to inspire artmaking decisions.

Clarification: Identifies and explains how technology or other resources influence photography.

Performance Level Descriptor: To demonstrate proficiency, students will identify and explain the processes of using technology and digital imaging to achieve certain results in their work.

Content Focus: Influence of technology on photography

Content Limits: Content includes, but is not limited to, use of zoom, digital camera settings, color settings, and digital editing programs.

Recommended DOK Level: Moderate

Item Types:

Constructed Response

Sample Constructed-Response Item:

Prompt:

Identify one way in which you could use technology to alter this image. Explain what effect this would have on the photograph.

Exemplar Response:

If you want to make this photo appear aged, you could alter it to black and white or sepia tone and then edit the image in Photoshop to make it appear grainier.

Item Rub	Item Rubric	
2 points	The student identifies one way of altering the photo and its effect on the photograph.	
1 point	The student identifies one way of altering the photograph but does not explain its effect on the photograph.	
0 points	The response indicates inadequate or no understanding of the concept needed to answer the item. The student may have written on a different topic or writtendon't know."	

Big Idea: Skills, Techniques, and Processes

Enduring Understanding: 1: The arts are inherently experiential and actively engage learners in the processes of creating, interpreting, and responding to art.

Benchmark: VA.912.S.1.4 Demonstrate effective and accurate use of art vocabulary throughout the art-making process.

Clarification: Use accurate vocabulary to identify and describe photography.

Performance Level Descriptor: To demonstrate proficiency, students will identify the correct term or describe a work of art using art and photography vocabulary.

Content Focus: Accurate use of vocabulary

Content Limits: Vocabulary includes but is not limited to terms related to photographic techniques and alternative processes, composition, and manipulation of images.

Recommended DOK Level: Low

Item Types:

• Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- · When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

What is an image that can be created in the dark room without a camera?

- A. Daguerreotype
- *B. Photogram
- C. Sensor

48

D. View finder

Big Idea: Skills, Techniques, and Processes

Enduring Understanding: 1: The arts are inherently experiential and actively engage learners in the processes of creating, interpreting, and responding to art.

Benchmark: VA.912.S.1.6 Describe processes and techniques used to record visual imagery.

Clarification: Describes the processes and techniques used while photoshooting.

Performance Level Descriptor: To demonstrate proficiency, students will identify and describe the processes and techniques used during the shooting process of the photography process.

Content Focus: Photographic processes and techniques

Content Limits: Processes and techniques include but are not limited to rule of thirds, depth of field, view points/camera angle, zooming, shooting close-up, panning, motion, lighting, and exposure times.

Recommended DOK Level: Moderate

Item Types:

• Constructed Response

Sample Constructed-Response Item:

Prompt

Describe two ways to maximize the sharpness of your photographs.

Exemplar Response:

Keep your lens clean, and focus your picture.

Item Rub	pric
2 points	 The student describes two ways to maximize the sharpness of photographs. Techniques and processes include: Keeping the lens clean Focusing image Using a tripod Reducing hand-shake Fast shutter speed Maximum depth of field
1 point	The student describes one way to maximize the sharpness of photographs.
0 points	The response indicates inadequate or no understanding of the concept needed to answer the item. The student may have written on a different topic or writtendon't know."

Big Idea: Skills, Techniques, and Processes

Enduring Understanding: 2: Development of skills, techniques, and processes in the arts strengthens our ability to remember, focus on, process, and sequence information.

Benchmark: VA.912.S.2.2 Focus on visual information and processes to complete the artistic concept.

Clarification: Identifies the process needed to develop a final composition.

Performance Level Descriptor: To demonstrate proficiency, students will identify the steps required to develop an artistic concept.

Content Focus: Creating and composing an artistic concept

Content Limits: Content including use of artistic skills and design techniques to control and manipulate photographs, including sequential photographs, resulting in the final process.

Recommended DOK Level: Moderate

Item Types:

50

• Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

Why do photographers compile a set of proofs?

- A. To create an animation
- B. To select the best test strip
- C. To create images in black and white
- *D. To select the best available photograph

Big Idea: Skills, Techniques, and Processes

Enduring Understanding: 3: Through purposeful practice, artists learn to manage, master, and refine simple, then complex, skills and techniques.

Benchmark: VA.912.S.3.1 Manipulate materials, techniques, and processes through practice and perseverance to create a desired result in two- and/or three-dimensional artworks.

Clarification: Identifies and describes how materials are manipulated and how techniques and processes are used to create a desired effect.

Performance Level Descriptor: To demonstrate proficiency, students will identify, describe, and manipulate terms, processes, and techniques of photography.

Content Focus: Photographers, styles, and genres

Content Limits: Content includes, but is not limited to, tools such as camera settings, accessories, digital programs, and a description of artistic processes in photography.

Recommended DOK Level: Moderate

Item Types:

- Multiple Choice
- Performance Task

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

What technique was used to edit this photograph?

- *A. Cropping
- B. Layering
- C. Resizing
- D. Zooming

Sample Performance Task:

Materials:

• The following digital photograph and photo editing software

Setup:

• Each student has his or her own computer, photo editing software, and provided digital photograph.

Prompt:

• Say: -Open the image in the photo editing software, and convert the color of the image to Sepia tone."

Item Rub	Item Rubric	
2 points	The student finds the correct editing feature on the computer and changes the photograph.	
1 point	The student finds the correct editing feature on the computer but can't change the photograph.	
0 points	The student is unable to perform the task, does not understand how to complete the task, or unsuccessfully completes the task.	

Big Idea: Skills, Techniques, and Processes

Enduring Understanding: 3: Through purposeful practice, artists learn to manage, master, and refine simple, then complex, skills and techniques.

Benchmark: VA.912.S.3.3 Review, discuss, and demonstrate the proper applications and safety procedures to use hazardous chemicals and equipment during the art-making process.

Clarification: Identifies the proper safety procedures when using hazardous chemicals and/or equipment when making art.

Performance Level Descriptor: To demonstrate proficiency, students will identify safety procedures when dealing with hazardous chemicals or equipment in the art room.

Content Focus: Safety procedures

Content Limits: Content includes, but is not limited to, the storage and disposal of dangerous materials and understanding the Material Safety Data Sheets (MSDS) labels.

Recommended DOK Level: Moderate

Item Types:

• Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

What tool can prevent skin contact with harmful chemicals?

- A. Mask
- *B. Tongs
- C. Goggles
- D. Eye wash

Big Idea: Skills, Techniques, and Processes

Enduring Understanding: 3: Through purposeful practice, artists learn to manage, master, and refine simple, then complex, skills and techniques.

Benchmark: VA.912.S.3.4 Demonstrate personal responsibility, ethics, and integrity, including respect for intellectual property, when accessing information and creating works of art.

Clarification: Identifies and describes how personal responsibility, ethics, and integrity affect photography and artworks.

Performance Level Description: To demonstrate proficiency, students will identify and describe the ethical and/or responsible choice in given scenarios.

Content Focus: Personal responsibility

Content Limits: Content includes, but is not limited to, plagiarism and appropriation from the Internet and other sources.

Recommended DOK Level: Moderate

Item Types:

Constructed Response

Sample Constructed-Response Item:

Prompt:

Identify a setting where it is inappropriate to take a photograph, and explain why.

Exemplar Response:

You should not take photographs in a museum because it might damage the artwork and be distracting to other visitors. Besides, some museum policies prohibit it.

Item Rub	vric
2 points	 The student describes an inappropriate place to take a photograph and explains why. Settings where it is inappropriate to take a photograph may include: Museum or gallery Concert, dance recital, or play Military base Historic church Minors without permission
1 point	The student describes an inappropriate place to take a photograph but doesn't explain why.
0 points	The response indicates inadequate or no understanding of the concept needed to answer the item. The student may have written on a different topic or written -L-don't know."

Big Idea: Skills, Techniques, and Processes

Enduring Understanding: 3: Through purposeful practice, artists learn to manage, master, and refine simple, then complex, skills and techniques.

Benchmark: VA.912.S.3.7 Use and maintain tools and equipment to facilitate the creative process.

Clarification: Identifies how to maintain and clean photography tools and equipment.

Performance Level Descriptor: To demonstrate proficiency, students will identify the correct way to maintain and clean photography tools and equipment.

Content Focus: Maintenance of tools and equipment

Content Limits: Content includes, but is not limited to cameras lenses, and camera accessories.

Recommended DOK Level: Low

Item Types:

56

Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

Which should be used to clean the lens of a camera?

- A. Soapy water and a small tissue paper
- B. Paper towel and small amount of soapy water
- C. Lens cap cover and small amount of cleaning solution
- *D. Lint free cleaning tissue and a small amount of cleaning solution

Big Idea: Skills, Techniques, and Processes

Enduring Understanding: 3: Through purposeful practice, artists learn to manage, master, and refine simple, then complex, skills and techniques.

Benchmark: VA.912.S.3.11 Store and maintain equipment, materials, and artworks properly in the art studio to prevent damage and/or cross-contamination.

Clarification: Identifies the correct storage and maintenance of equipment and materials in the art studio.

Performance Level Descriptor: To demonstrate proficiency, students will identify how equipment and materials should be stored properly in the art studio to prevent damage and cross-contamination.

Content Focus: Storage of art materials

Content Limits: Content includes, but is not limited to, photography equipment, materials, and artworks.

Recommended DOK Level: Low

Item Types:

• Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

Where should you store your photographic prints?

- *A. In a cool, dry place
- B. In the trunk of a car
- C. Under an air conditioner
- D. Stacked on other photographs

Big Idea: Organizational Structure

Enduring Understanding: 1: Understanding the organizational structure of an art form provides a foundation for appreciation of artistic works and respect for the creative process.

Benchmark: VA.912.O.1.1 Use the structural elements of art and the organizational principles of design in works of art to establish an interpretive and technical foundation for visual coherence.

Clarification: Demonstrates understanding of elements of art or principles of design in photography.

Performance Level Descriptor: To demonstrate proficiency, students will describe how elements of art or principles of design are used in photography.

Content Focus: Elements of art and principles of design

Content Limits: Elements of art and principles of design as well as photographic techniques.

Recommended DOK Level: Moderate

Item Types:

- Multiple Choice
- Constructed Response

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

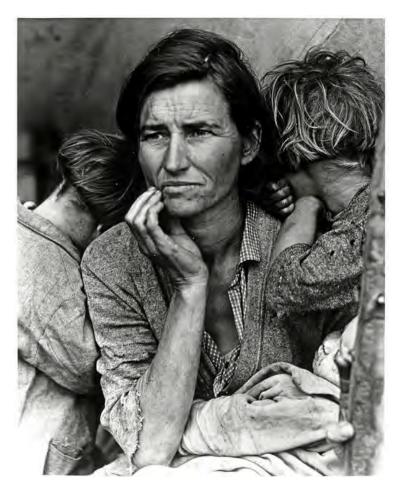

Which element creates movement in the photograph?

- A. Color
- *B. Line
- C. Space
- D. Texture

Sample Constructed-Response Item:

Prompt:

Describe two ways an element of art or principle of design contributes to the feeling of despair in this photograph.

Exemplar Response:

60

The texture of the clothing in the photograph is very harsh, and the black and white color scheme makes the image seem sad.

Item Rubric	
2 points	The student describes two ways an element of art or principle of design contributes to the feeling of despair in this photograph.
1 point	The student describes one ways an element of art or principle of design contributes to the feeling of despair in this photograph.
0 points	The response indicates inadequate or no understanding of the concept needed to answer the item. The student may have written on a different topic or writtendon't know."

Big Idea: Organizational Structure

Enduring Understanding: 2: The structural rules and conventions of an art form serve as both a foundation and departure point for creativity.

Benchmark: VA.912.O.2.2 Solve aesthetic problems, through convergent and divergent thinking, to gain new perspectives.

Clarification: Uses various perspectives to solve aesthetic problems

Performance Level Descriptor: To demonstrate proficiency, students will identify or describe how to solve a problem.

Content Focus: Problem solving

Content Limits: Content includes, but is not limited to, basic understanding of practices related to using digital and manual cameras.

Recommended DOK Level: Moderate

Item Types:

- Multiple Choice
- Constructed Response

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

What can be used to create contrast in a landscape?

- A. Use a tripod
- *B. Use a polarizing filter
- C. Use a wide-range lens
- D. Use a longer shutter speed

Sample Constructed-Response Item:

Prompt:

Identify two ideal conditions for photographing a portrait outdoors.

Exemplar Response:

Two ideal conditions for photographing a portrait outdoors would be an overcast sky or photoshooting late in the day.

Item Rub	pric
2 points	The student identifies two ideal conditions for photographing a portrait outdoors.
	Ideal conditions may include:
	Overcast
	Late in the day
	Dusk or dawn
	While using a diffusion screen
1 point	The student identifies one ideal condition for photographing a portrait outdoors.
0 points	The response indicates inadequate or no understanding of the concept needed to
	answer the item. The student may have written on a different topic or written +don't
	know."

Big Idea: Organizational Structure

Enduring Understanding: 3: Every art form uses its own unique language, verbal and non-verbal, to document and communicate with the world.

Benchmark: VA.912.O.3.1 Create works of art that include symbolism, personal experiences, or philosophical view to communicate with an audience.

Clarification: Creates a composition that communicates an idea.

Performance Level Descriptor: To demonstrate proficiency, students will create a composition that communicates symbolism, personal experience, or philosophical views.

Content Focus: Visual communication

Content Limits: Content includes, but is not limited to using symbolism, personal experiences, and philosophical views to communicate with an audience.

Recommended DOK Level: High

Item Types:

• Performance Task

Sample Performance Task:

Materials:

• An assortment of photos and magazines, letter-sized paper, scissors, and glue

Setup:

• Each student has his or her own workspace. Students may share photos and magazines.

Prompt:

• Say: -Greate a photo collage that communicates peace, and apply the elements of art and principles of design."

Item Ru	Item Rubric	
2 points	The student creates a photo collage that communicates peace and creates the compositional principle of unity.	
1 point	The student creates a photo collage that either communicates peace or has compositional unity.	
0 points	The student is unable to perform the task, does not understand how to complete the task, or unsuccessfully completes the task.	

Big Idea: Historical and Global Connections

Enduring Understanding: 1: Through study in the arts, we learn about and honor others and the worlds in which they live(d).

Benchmark: VA.912.H.1.4 Apply background knowledge and personal interpretation to discuss cross-cultural connections among various artworks and the individuals, groups, cultures, events, and/or traditions they reflect.

Clarification: Identifies or describes connections shared between artworks that reflect different individuals, groups, cultures, events, or traditions.

Performance Level Descriptor: To demonstrate proficiency, students will Identify or describe the connections shared between artworks reflecting different individuals, groups, cultures, events, or traditions.

Content Focus: Cultural connections

Content Limits: Content includes, but is not limited to, groups, cultures, events, and/or traditions of two different cultures that students are familiar with.

Recommended DOK Level: Low

Item Types:

• Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- · When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

What is the connection between these cultures?

- *A. Dance
- B. Literature
- C. Pottery
- D. Technology

Big Idea: Historical and Global Connections

Enduring Understanding: 1: Through study in the arts, we learn about and honor others and the worlds in which they live(d).

Benchmark: VA.912.H.1.8 Analyze and compare works in context, considering economic, social, cultural, and political issues, to define the significance and purpose of art.

Clarification: Interprets the content of photography in its context.

Performance Level Descriptor: To demonstrate proficiency, students will identify the economic, social, cultural, or political issues presented in photography.

Content Focus: Analyzing issues presented in photography

Content Limits: Avoid biases and fairness issues.

Recommended DOK Level: High

Item Types:

Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

What is the issue presented in this photograph?

- *A. Education
- B. Marketing
- C. Political parties
- D. Cultural differences

Big Idea: Historical and Global Connections

Enduring Understanding: 1: Through study in the arts, we learn about and honor others and the worlds in which they live(d).

Benchmark: VA.912.H.1.9 Describe the significance of major artists, architects, or masterworks to understand their historical influences.

Clarification: Applies art knowledge to identify the works of major photographers.

Performance Level Descriptor: To demonstrate proficiency, students will describe or identify the work of major photographers.

Content Focus: Historical influences and artistic movements within photography

Content Limits: Content includes, but is not limited to, the works of major photographers (for example, Ansel Adams, Lewis Hine, Alfred Stieglitz, Dorothy Lang, Annie Leibovitz), their influence on photography, terms that describe artistic styles within photography, and the cultural significance and symbolism of photography.

Recommended DOK Level: Moderate

Item Types:

- Multiple Choice
- Constructed Response

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

Which photographer is known for his social reform and child labor?

- A. Andy Warhol
- B. Georgia O'Keefe
- *C. Lewis Hine
- D. Robert Doisneau

Sample Constructed-Response Item:

Prompt:

Describe two things Ansel Adams was known for.

Exemplar Response:

Ansel Adams was known for black-and-white photographs of wilderness and landscapes.

Item Rub	ric
2 points	The student describes two things that Ansel Adams is known for:
	Black-and-white photographs
	Photographs of the wilderness
	Photographs of nature
	 Photographs of landscapes
	Conservationism/national parks
	Zone system
1 point	The student replies with one thing Ansel Adams is known for.
0 points	The response indicates inadequate or no understanding of the concept needed to
	answer the item. The student may have written on a different topic or writtendon't
	know."

Big Idea: Historical and Global Connections

Enduring Understanding: 2: The arts reflect and document cultural trends and historical events, and help explain how new directions in the arts have emerged.

Benchmark: VA.912.H.2.1 Identify transitions in art media, technique, and focus to explain how technology has changed art throughout history.

Clarification: Identifies the progression of photography throughout history.

Performance Level Descriptor: To demonstrate proficiency, students will identify or describe the evolution of photography with a focus on technology.

Content Focus: Evolution of photography

Content Limits: Content includes, but is not limited to, technological advancements in cameras, digital editing programs, and camera accessories and equipment.

Recommended DOK Level: Moderate

Item Types:

• Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

Which timeline shows the progression of technology in photography?

- A. Cell phone camera digital camera disposible camera
- B. Cell phone camera disposable camera digital camera
- C. Disposable camera cell phone camera digital camera
- *D. Disposible camera digital camera cell phone camera

Big Idea: Historical and Global Connections

Enduring Understanding: 3: Connections among the arts and other disciplines strengthen learning and the ability to transfer knowledge and skills to and from other fields.

Benchmark: VA.912.H.3.1 Synthesize knowledge and skills learned from non-art content areas to support the processes of creation, interpretation, and analysis.

Clarification: Applies non-art content knowledge and describes how it can relate to photography.

Performance Level Descriptor: To demonstrate proficiency, students will create works of art that are inspired by knowledge and skills from non-art content areas.

Content Focus: Art connections

Content Limits: Content includes, but is not limited to, application of non-art content areas to photography.

Recommended DOK Level: High

Item Types:

• Performance Task

Sample Performance Task:

Materials:

• Camera, paper, and pencil. Computer and photo editing software if needed

Setup:

• Each student has his or her own materials and workspace.

Prompt:

• Say: Use your camera to photograph a composition with a mathematical concept. Explain your concept."

Item Rub	Item Rubric	
2 points	The student's composition has a mathematical concept that includes one of the following (or other mathematical concept): symmetry, patterns, or geometry; the student explains the concept.	
1 point	The student's composition has a mathematical theme, but he or she can't explain it. OR	
	The student explains the mathematical theme, but the composition doesn't show it.	
0 points	The student is unable to perform the task, does not understand how to complete the task, or unsuccessfully completes the task.	

Big Idea: Innovation, Technology, and the Future

Enduring Understanding: 1: Creating, interpreting, and responding in the arts stimulate the imagination and encourage innovation and creative risk-taking.

Benchmark: VA.912.F.1.3 Demonstrate flexibility and adaptability throughout the innovation process to focus and re-focus on an idea, deliberately delaying closure to promote creative risk-taking.

Clarification: Interprets the importance of problem-solving when creating or critiquing a composition.

Performance Level Descriptor: To demonstrate proficiency, students will describe the importance of flexibility, brainstorming, and creative risk-taking.

Content Focus: Problem solving

Content Limits: Content includes, but is not limited to, student-created photography and the art-making process.

Recommended DOK Level: High

Item Types:

Constructed Response

Sample Constructed-Response Item:

Prompt:

Explain why you might revisit a subject several times, and describe one revision you could make during your process.

Exemplar Response:

I would revisit a subject to make a creative change. The change could involve a new camera angle.

Item Rubric		
2 points	The student describes why a subject may be revisited several times and one revision that could be made during the process. Reasons why a subject may be revisited may include:	
	Making a creative change	
	To review more closely	
	To correct a technical issue	
1 point	The student describes why a subject may be revisited several times or describes one revision that could be made to photographs.	
0 points	The response indicates inadequate or no understanding of the concept needed to answer the item. The student may have written on a different topic or written -L-don't know."	

Big Idea: Innovation, Technology, and the Future

Enduring Understanding: 1: Creating, interpreting, and responding in the arts stimulate the imagination and encourage innovation and creative risk-taking.

Benchmark: VA.912.F.1.4 Use technological tools to create art with varying effects and outcomes.

Clarification: Creates varying effects and outcomes by using technology in photography.

Performance Level Descriptor: To demonstrate proficiency, students will create a work of art with varying effects and outcomes by adjusting or manipulating the settings of digital equipment and photo editing software.

Content Focus: Using technology

Content Limits: Effects include, but are not limited to, color changes, image resizing, image manipulation, and lighting changes.

Recommended DOK Level: Moderate

Item Types:

• Performance Task

Sample Performance Task:

Materials:

The following digital photograph, a computer, and photo editing software

Setup:

• Each student has his or her own materials and workspace.

Prompt:

• Say: -Open the image in photo editing software, locate the red-eye correcting tool, and correct the red eye in this photograph."

Item Rubric		
2 points	The student successfully uses the software feature and corrects the red eye in the photograph.	
1 point	The student finds the feature on the software but cannot change the red eye on the photograph or makes incorrect changes to the photograph.	
0 points	The student is unable to perform the task, does not understand how to complete the task, or unsuccessfully completes the task.	

Big Idea: Innovation, Technology, and the Future

Enduring Understanding: 2: Careers in and related to the arts significantly and positively impact local and global economies.

Benchmark: VA.912.F.2.1 Examine career opportunities in the visual arts to determine requisite skills, qualifications, supply-and-demand, market location, and potential earnings.

Clarification: Examines career opportunities in photography and the visual arts to determine requisite skills.

Performance Level Descriptor: To demonstrate proficiency, students will identify or describe the requisite skills, qualifications, supply and demand, market location, and potential earnings of photography-related careers.

Content Focus: Careers related to photography

Content Limits: Content is limited to careers related to photography.

Recommended DOK Level: Moderate

Item Types:

• Multiple Choice

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus

Sample Multiple-Choice Item:

A museum is planning a major photography exhibit on Latin American architecture in the mid-20th century. Which person will be responsible for assisting in the preparation of the exhibit?

- A. Anthropologist
- B. Architect
- *C. Curator
- D. Journalist

Big Idea: Innovation, Technology, and the Future

Enduring Understanding: 3: The 21st-century skills necessary for success as citizens, workers, and leaders in a global economy are embedded in the study of the arts.

Benchmark: VA.912.F.3.4 Follow directions and use effective time-management skills to complete the art-making process and show development of 21st-century skills.

Clarification: Use photography skills to take a photograph in a timely manner.

Performance Level Descriptor: To demonstrate proficiency, students will use their skills to create a composition in a timely manner.

Content Focus: Analyzing creative technology

Content Limits: Content includes, but is not limited to, punctuality, reliability, diligence, and a positive work ethic.

Recommended DOK Level: Moderate

Item Types:

• Performance Task

Sample Performance Task:

Materials:

• Still-life setup and at least one source of light. Computer and photo editing software if necessary

Setup:

• Each student has his or her own materials, and students may share a workspace.

Prompt:

• Say: —Take a still-life photograph. Be sure to demonstrate your effective composition and lighting."

Item Rubric		
2 points	The student uses the camera to take a photograph with effective lighting and composition that is technically proficient.	
1 point	The student uses the camera to take a photograph with two of the three components (for example, the photograph is out of focus, but the lighting and composition in acceptable).	
0 points	The student is unable to perform the task, does not understand how to complete the task, or unsuccessfully completes the task.	

Big Idea: Innovation, Technology, and the Future

Enduring Understanding: 3: The 21st-century skills necessary for success as citizens, workers, and leaders in a global economy are embedded in the study of the arts.

Benchmark: VA.912.F.3.10 Apply rules of convention to create purposeful design.

Clarification: Uses rules of convention to take photographs.

Performance Level Descriptor: To demonstrate proficiency, students will create a composition or design using the rules of convention.

Content Focus: Rules of convention

Content Limits: Rules of convention include but are not limited to the rule of thirds, depth of field, framing, balance, focal point, perspective/camera angle

Recommended DOK Level: High

Item Types:

• Performance Task

Sample Performance Task:

Materials:

 Still-life setup and at least one source of light. Computer and photo editing software if necessary

Setup:

• Each student has his or her own materials and workspace.

Prompt:

• Say: -Take a photograph that demonstrates shallow of depth of field and effective composition."

Item Rubric		
2 points	The student takes a photograph with shallow depth of field and effective composition.	
1 point	The student takes a photograph with either shallow depth of field or effective composition.	
0 points	The student is unable to perform the task, does not understand how to complete the task, or unsuccessfully completes the task.	

Standard: LAFS.910.W.2.4

Strand: Writing Standards

Cluster: 2. Production and Distribution of Writing

Standard: LAFS.910.W.2.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Clarification: Writes art-related content in clear and coherent paragraphs.

Performance Level Descriptor: To demonstrate proficiency, students will write a short essay to a targeted audience that is clear and coherent.

Content Focus: Writing in art

Content Limits: Students must be instructed to write a short essay in the prompt of the item. Art-related content is limited to color, black-and-white, digital, and traditional photography as per state course description.

Recommended DOK Level: Moderate

Item Types:

Constructed Response

Standard: LAFS.910.W.2.6

Strand: Writing Standards

Cluster: 2. Production and Distribution of Writing

Standard: LACC.910.W.2.6 Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.

Clarification: Uses or understands the computer and/or Internet as a tool to produce a written component on an art-related topic.

Performance Level Descriptor: To demonstrate proficiency, students will use or understand the computer and/or research on the Internet as a tool to create a written component on an art-related topic.

Content Focus: Computers used to write for art with a focus on photography

Content Limits: Students must be provided a specific topic when instructed to research on the Internet. Art-related content is limited to color, black-and-white, digital, and traditional photography as per state course description.

Recommended DOK Level: Moderate

Item Types:

- Multiple Choice
- Performance Task

Multiple-Choice Attributes:

- Each item will have four options.
- Options can appear as photographs, illustrations, single words, or short phrases and sentences.
- When a stimulus is used, options will be ordered as they appear in the stimulus
