GUIDELINES FOR DIGITAL SUBMISSIONS

FOR 2-D ARTWORK:

The camera lens should be parallel to the artwork surface. Do not angle the lens as this distorts the image. Experiment with a variety of lighting to see what works best. Avoid camera flash back or images that are too dark. Fill the frame of the camera with the artwork. Do not allow school red brick to appear in the shot! For 2-D artwork that will fit on a bed of a digital scanner, scan the image at 100%.

FOR 3-D ARTWORK:

Submit two images (different views) of three-dimensional artwork. **See below for details.** Do not allow school red brick to appear in the shot! Consider using a black or white background.

ADJUSTING WITH SOFTWARE:

FAEA asks that images are only altered in the following ways:

- **Orientation:** Works should be rotated properly so that a work is not laying on its side when viewing. Re-orientation during adjudication may not be possible, or may distort the dimensions of the image.
- **Cropping:** Crop background other than the artwork.
- **Color adjustment:** Only to adjust for lighting during photography and not to enhance the artwork itself.

JPG FILES:

JPG should be captured by a 2+ megapixel camera. Set camera for "fine" or "extra fine" resolution not "web" or "normal." For photographs, participants may scan the print at 100% and save as a JPG file.

- **Image Print Size:** Each JPG file must be at least 1500 x 2100 pixels.
- **Image Quality:** Should be at 300 dpi.
- **File Size:** Each JPG file should be at least one megabyte but no greater than 10 megabytes. (Generally, JPG files at 1500 x 2100 pixels are approximately 4 – 5 megabytes or less.)
- Entries that are not JPG files or named incorrectly will be disqualified.

SAVE FILES AS:

- **Important:** Name the file with participant's LastName_FirstName, category, and title.
- For long titles abbreviate with a few key words.
- **Example:**
Smith_John Drawing Self Portrait in Blue.jpg
Smith_John Graphic Design Logo Project.jpg
- Entries that are not JPG files or named incorrectly will be disqualified.

BURN THE JPG IMAGES TO CD-ROM:

Using CD burning software **such as** Roxio Easy Media Creator (www.roxio.com) or another program, save the files per category to CD-ROMs in the schema as outlined in the following pages. If you hire a professional digital photographer, you may want to share the following information and have the photographer burn CD-ROMs for you with the following organization in mind. Label school CD-ROM and protect each CD-ROM with a jewel case or paper sleeve.
